

Viewing Your Tickets through the Ticketmaster App (iPhone)

To expedite the entry process, we highly recommend downloading your tickets prior to arriving at DPAC.

- 1) Download the Ticketmaster app and select the image of tickets on the bottom bar. See image below:

- 2) You will then see a list of your upcoming Ticketmaster orders. Tap the show you are attending to view your mobile tickets.
- 3) Tap each ticket to view the barcode/ QR code. This is what will be scanned into the theater.

Note: The QR code might be concealed if you are viewing your tickets well in advance. The QR code will be completely visible when you arrive at DPAC for your event.

- 4) If you purchased multiple tickets, you can simply swipe the screen to view the other QR codes. You do not have to go back and select each individual seat when scanning into the theater.
